

SAMUEL LALMUANPUIA PACHUAU

+91 9612041068 | samuellmpachuu@gmail.com | [GitHub](#) | [LinkedIn](#) | Aizawl, Mizoram

EDUCATION

Govt. College of Engineering, Tirunelveli

2023 – 2027

B.E. Computer Science and Engineering | Tamil Nadu, India

TECHNICAL SKILLS

Languages: Python, Java, C, PHP

Web & Frameworks: React (JSX), Node.js, Express.js, Django, PHP Laravel, HTML/CSS, Tailwind CSS

Databases: MySQL, SQLite, SQL

Tools & Platforms: Git, GitHub, IBM Cognos Analytics, Ollama (local LLM)

EXPERIENCE

Adroit Technologies Innovative Solution Pvt Ltd

Mar 2026 – Apr 2026

Data Analyst Intern | Remote

- Built reports in IBM Cognos Analytics to analyze project performance, employee attrition, budgeting, and resource utilization.
- Conducted a business analytics case study, uncovering operational insights through data visualization and story-based reports.
- Analyzed planned vs. actual costs and billing rates to assess project efficiency and identify cost optimization opportunities.

Lailen Consulting Pvt Ltd

Jul 2025 – Aug 2025

Software Engineering Development Intern | On-Site

- Independently developed a full-stack E-Ticketing System as part of an internship project, covering event creation, booking management, and user/admin authentication.
- Implemented QR-code-based e-tickets with seat allocation and real-time booking verification, streamlining event entry.
- Designed and managed a MySQL relational database schema to store and query event, booking, and user data efficiently.

PROJECTS

HabitAI — React · Node.js · Express.js · SQLite · Ollama · Tailwind CSS

- Won the IBM NM Hackathon 2025–26 competing as a team of 4, building a gamified habit-tracking app with streak tracking, freeze options, heatmap progress visualization, and a rewards system.
- Contributed fullstack — built React frontend components and Express.js backend APIs, and integrated a locally-hosted LLM via Ollama to power a personalized AI coaching feature.
- Designed the SQLite database schema for user habits, streaks, and reward data, ensuring efficient querying for real-time progress updates.

E-Ticketing System — PHP Laravel · MySQL · QR Code

- Built a full-stack event management and e-ticketing platform in a team of 3–5 interns, handling event creation, ticket booking, and attendee management end-to-end.
- Developed an admin panel for organizers to manage events, bookings, ticket sales, and user details, reducing manual coordination overhead.
- Implemented QR-code-based e-ticket generation and validation to streamline ticket verification at event entry points.

ACHIEVEMENTS

- Winner, IBM NM Hackathon 2025–26 — built and presented HabitAI, a full-stack AI-powered habit tracker, beating competing teams.
